**Denver, CO – May 22nd, 2023.** Component Distributors, Inc. (CDI), a value-added distributor of electronic components and lighting solutions, is excited to announce a strategic partnership with Magtech Industries, manufacturer of high-performance power supplies, LED drivers and wireless lighting technologies. This collaboration allows CDI to present customers with a diverse range of innovative lighting products, including Magtech's ATOM series of wireless wall-mount switches, QM series of LED drivers and wireless load controllers.

The ATOM wireless wall-mount switch streamlines commissioning and simplifies installation by replacing traditional in-wall switches. It features multiple scene controls, a built-in relay for on-off control, and integrated Casambi Bluetooth-enabled wireless technology for added convenience and multi-functional versatility. The ATOM series switch also operates at low power loads without requiring an additional power adapter or separate system control, further reducing costs.

The QM family, featuring yet another series of innovative compact LED drivers, is available with both constant current and constant voltage outputs. Both versions include 4 in 1 dimming (TRIAC/ELV/0-10V/PWM) and employ an advanced algorithm for dimming variations of less than 1%. QM products deliver high-density power solutions for both indoor and outdoor applications with an optional Bluetooth-enabled wireless capability. Furthermore, the QM constant current series features output current programmability and is the first of its kind to be phase-cut compatible with constant-voltage outputs. All versions have UL Class P rating.

“We are thrilled to partner with Magtech Industries to broaden our product range and offer our customers exceptional LED lighting and power solutions,” said Doug Slansky, President of CDI. “This collaboration will benefit our customers as we continue to fulfil our commitment to supply new lighting technologies alongside our ecosystem partners.”

“We are excited to partner with CDI in this particular market segment,” said Michael Kuo, President of Magtech. “With CDI’s experienced sales forces, customers can obtain the necessary parts faster, boosting market recognitions and shares quickly.”

Integrating Magtech's wireless lighting technology complements CDI's existing LED lighting and power portfolio, creating a one-stop shopping for lighting solutions. This partnership with Magtech Industries allows CDI to meet the growing demand for energy-efficient, customizable, and wireless LED lighting controls. CDI's customers can now benefit from Magtech's cutting-edge technologies and expertise, facilitating faster commissioning and cost reduction while future-proofing their lighting solutions.

## About Component Distributors, Inc. (CDI)

Component Distributors, Inc. (CDI) is a value-added distributor of high-performance, LED lighting solutions. CDI distributes globally and offers local application support and customer service across the Americas. CDI delivers innovative Lighting Solutions by complementing application support, development tools and design services around high performance products with industry leading manufacturers. Learn more about our Lighting Solution partners at [led.cdiweb.com/manufacturers/](http://led.cdiweb.com/manufacturers/)

## About Magtech Industries

Magtech Industries is a global leader in the design and manufacture of power supplies, LED drivers and wireless control solutions. With over 32 years of experience, Magtech develops innovative, energy-efficient, and reliable products that caters to the needs of its customers. Magtech's products have gained industry recognition, receiving Lightfair's Technical Innovation award for its ATOM series of wall mounted switches and LynxEM wireless control systems. Discover more about Magtech's products at [magtechind.com](http://magtechind.com) or join us at booth# 1969 during Lightfair 2023, from May 23-25, 2023, at the Javits Center in New York City.
