CDI and mwConnect: Lighting the Way Towards the future with New Partnership

Denver, Colorado, May 24, 2023 – Component Distributors Inc (CDI), a value-added distributor of electronic components and lighting solutions, has announced a strategic partnership with mwConnect, a leading manufacturer of wireless mesh lighting controls. This new agreement enables CDI to offer its customers a comprehensive line of lighting controls and building automation products, enriching its ecosystem of lighting solutions. The partnership introduces a full range of mwConnect's Casambi Bluetooth-enabled lighting controls, occupancy sensors, step-down transformers, and power solutions for indoor and outdoor LED lighting applications.

These award-winning devices deliver versatility and offer the potential for future scalability. This new product offering includes a variety of occupancy and motion sensors, wall switches, wall switch sensors, ceiling mount sensors, dimming power packs, and fixture controllers, all allowing remote configuration of sensor and dimming settings. These components feature 0-10v dimming, adhering to energy code requirements while supporting performance management and energy efficiency strategies. Customers can realize the convenience and flexibility of this new technology while reaping potential cost benefits.

"Our goal is to bring tangible value and growth opportunities to our OEM and contractor customers, giving them access to the best possible lighting and building automation products," commented Doug Slansky, President of Component Distributors Inc, "We're excited to work collaboratively with mwConnect to support our customers' transition to smart wireless lighting, helping them to accelerate commissioning, simplify installation and minimize complexity with these new connected technologies."

"We're delighted to partner with CDI to make this advanced technology more accessible in the marketplace," said Stephen Zhou, Executive Vice President of mwConnect, "CDI has the trust and respect of its customers, and we value those qualities immensely. We look forward to working with the CDI team to bring these wireless solutions to projects of all kinds."

This partnership capitalizes on the synergies of mwConnect and CDI with the goal of delivering innovative, high-quality products to their customers. Both CDI and mwConnect are committed to consistently introducing new lighting technologies that not only meet their customers' needs but also set new standards in the marketplace.

About Component Distributors, Inc. (CDI)

Component Distributors Inc (CDI) is a value-added distributor of high-performance LED lighting solutions. CDI distributes globally and offers local application support and customer service across the Americas. CDI delivers innovative Lighting Solutions by complementing application support, development tools and design services around high performance products with industry leading manufacturers.
