

CDI and mwConnect: Lighting the Way Towards the future with New Partnership

Description

CDI and mwConnect: Lighting the Way Towards the future with New Partnership

Denver, Colorado, May 24, 2023 – Component Distributors Inc (CDI), a value-added distributor of electronic component and lighting solutions, has announced a strategic partnership with mwConnect, a leading manufacturer of wireless mesh lighting controls. This new agreement enables CDI to offer its customers a comprehensive line of lighting controls and building automation products, enriching its ecosystem of lighting solutions. The partnership introduces a full range of mwConnect's Casambi Bluetooth-enabled lighting controls, occupancy sensors, step-down transformers, and powe solutions for indoor and outdoor LED lighting applications.

These award-winning devices deliver versatility and offer the potential for future scalability. This new product offering includes a variety of occupancy and motion sensors, wall switches, wall switch sensors, ceiling mount sensors, dimming power packs, and fixture controllers, all allowing remote configuration of sensor and dimming settings. These component feature 0-10v dimming, adhering to energy code requirements while supporting performance management and energy efficiency strategies. Customers can realize the convenience and flexibility of this new technology while reaping potential cost benefits.

"Our goal is to bring tangible value and growth opportunities to our OEM and contractor customers, giving them accept to the best possible lighting and building automation products,†commented Doug Slansky, President of Component Distributors Inc, "We're excited to work collaboratively with mwConnect to support our customers' transition smart wireless lighting, helping them to accelerate commissioning, simplify installation and minimize complexity with the new connected technologies.â€

"We're delighted to partner with CDI to make this advanced technology more accessible in the marketplace,†stephen Zhou, Executive Vice President of mwConnect, "CDI has the trust and respect of its customers, and we val those qualities immensely. We look forward to working with the CDI team to bring these wireless solutions to projects of kinds.―

This partnership capitalizes on the synergies of mwConnect and CDI with the goal of delivering innovative, high-quality products to their customers. Both CDI and mwConnect are committed to consistently introducing new lighting technologithat not only meet their customers' needs but also set new standards in the marketplace.
