Denver, CO – September 14th, 2023. Component Distributors, Inc. (CDI), a value-added distributor of electronic components and lighting solutions, announces its strategic partnership with GRE Alpha, an innovative provider of high-performance power supplies, LED controls and cutting-edge, wireless lighting technologies. This collaboration aims to offer customers access to advanced Wireless, Bluetooth Low Energy (BLE) controllers along with GRE Alpha's SLD Multi-Function Dimming Modules.

GRE Alpha's multifunctional dimming module is a 200 Watt, 2 and 5-channel output constant voltage LED dimming module that allows for seamless integration with Casambi-enabled luminaires, sensors and both wall mounted and wireless switches. This multifunction module can be set up to operate in Tunable White, Dim to Warm or basic 0-100% dimming modes within the Casambi App. It offers unparalleled flexibility and ease of use, making this product line ideal for retrofit lighting applications as well as commercial, retail and office lighting applications.

"Partnering with GRE Alpha is a significant milestone for CDI as we expand our comprehensive ecosystem of lighting partners to better serve the increasing demands of our customers and the industry." Said Doug Slansky, President at CDI. "Our customers are continually looking for wireless, smart lighting solutions that provides ease of installation, simplified customization and lowered costs of commissioning across a standard platform. GRE Alpha's family of wireless-enabled, LED control and power products provides that flexibility for all our customers' wireless lighting projects."

"Our new partnership with CDI further expands our products, company brand, and market reach. CDI is a leading distributor offering unique products and service solutions in the lighting market, further enhancing GRE Alpha's position as a premium brand offering highly differentiated smart lighting power and control solutions." Said Richard Fong, Director of GRE Alpha.

As the demand for energy-efficient lighting solutions and wireless-enabled devices continues to grow, the need for more reliable and advanced control systems becomes more important. CDI and GRE Alpha represent a collaboration that combines CDI's extensive distribution network, customer support and prompt delivery with GRE Alpha's innovative product portfolio and engineering capabilities. By incorporating these advanced technologies into their lighting applications, customers stand to obtain a significant competitive advantage.
