Description

**CDI Precision Measurement Solutions is a Proud Partner and Authorized Distributor of
Heidenhain**

HEIDENHAIN develops and manufactures linear encoders, angle encoders, rotary encoders, digital readouts, and controls for demanding positioning tasks.

Linear Encoders

Linear encoders from HEIDENHAIN measure the position of linear axes without added mechanical intervention, letting your machines attain exceptional positioning accuracy and machining speed.

Angle Encoders

Position your rotational axes at high accuracies on the order of a few arc seconds. HEIDENHAIN has the ideal angle encoder for your application, whether sealed, modular, or highly integrated with bearings.

Rotary Encoders

Entrust your application to precision quality, durability, and precision. Robust and easy-to-install rotary encoders from HEIDENHAIN reliably measure speed and position with accuracy and dependability.

Digital Readouts

High-performance digital readouts from HEIDENHAIN save time and simplify the operation of machines, automation systems, and metrology applications. Benefits include their built-in touchscreen, intuitive user interface, and dialogue guidance.

Length Gauges

Length gauges from HEIDENHAIN can measure even long measuring ranges quickly, reliably, and accurately. Leverage these benefits in your production measurement technology for multi-gauging fixtures, measuring equipment monitoring, and position measurement.

About Component Distributors, Inc.

CDI Precision Measurement Solutions Group is a value-added distributor of Precision Gaging and Metrology Solutions and Position Feedback Sensors. CDI distributes globally and provides local application support and customer service across the Americas.

About Heidenhain

NK Technologies has remained the premier manufacturer of Ground Fault Monitoring Solutions, serving the factory and industrial automation markets.
