

New MEAN WELL XLN/XLC Compact UL Class P LED Lighting Drivers

Description

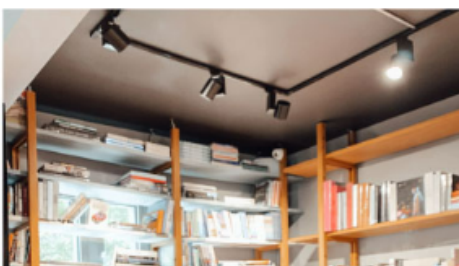

Compact, Reliable and Cost Effective Lighting Applications

The new generation XLN and XLC series are plastic housing LED drivers from MEAN WELL, designed with double insulation and class II/2 for general indoor lighting or commercial luminaires. Key features include compact size, constant voltage and constant current output, multiple dimming functions, outlet with wiring terminal blocks. The XLN/XLC series are designed for your LED power supply, various lighting fixture or LED strip applications.

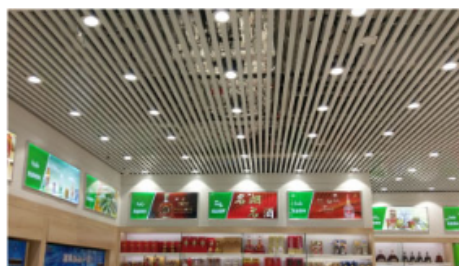

The constant current output adopts a constant power mode and provides a wide range of current adjustment functions, the output current can be adjusted with onboard DIP switching or remotely with the MEAN WELL mobile app. It also incorporates NFC and has 3-in-1 DALI-2 digital dimming and KNX/Bluetooth/Matter wireless dimming.
