

New MEAN WELL Ultra Low Profile,  
PCB Type Power Supplies

## New MEAN WELL Ultra Low Profile, PCB Type Power Supplies

### Description

## Compact, Reliable and Cost-Effective Power Supplies for Class I Applications

Introducing MEAN WELL's ultra-slim PCB type power supply, the LOP-200/300 series featuring a compact 2" size delivering 200W/300W power while the LOP-400/500/600 with power ratings of 400W/500W/600W 5" x 3" footprint. These high-quality, high-efficiency power supplies offer excellent EMC performance and reliability for use in Class I or II systems, perfect for communication, network, medical, and industrial applications.

### Additional Features Include

- Delivers 150% peak power for up to 3 seconds.
- Maximum efficiency up to 95%.
- Short Circuit, Overload, Overvoltage and Temperature protection.
- Extremely low leakage current (<500uA to ground, <70uA to contact)
