

LEDiL's FLORENCE Lens Helps Modernize Finlandia Hall's Lighting

Description

LEDiL

Project

Finlandia Hall, designed by renowned architect Alvar Aalto, is a landmark in Helsinki, Finland. While the clight fixtures, also designed by Aalto, were iconic, they required modernization to meet contemporary light standards and improve the building's functionality for modern events. Tunto Lighting took on the chal of upgrading these fixtures with RGBW technology while preserving their historical aesthetics.

The primary goal was to upgrade the lighting system to RGBW technology, enabling dynamic color change enhanced lighting control without compromising the integrity of the original design. Achieving high light integrated and maintaining the quality of white light were critical requirements.

LEDiL Product Used â€" FLORENCE-Z90
