Compact, Reliable and Cost Effective Lighting Applications

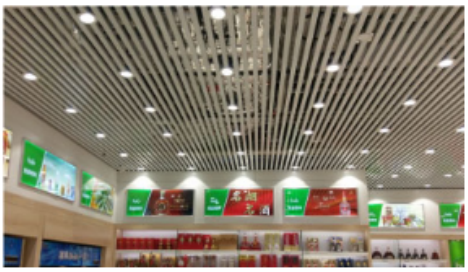

The new generation XLN and XLC series are plastic housing LED drivers from MEAN WELL, designed wi
double insulation and class II/2 for general indoor lighting or commercial luminaires. Key features include
compact size, constant voltage and constant current output, multiple dimming functions, outlet with wiring
terminal blocks. The XLN/XLC series are designed for your LED power supply, various lighting fixture or L
strip applications.

The constant current output adopts a constant power mode and provides a wide range of current adjustm
functions, the output current can be adjusted with onboard DIP switching or remotely with the MEAN WEL
mobile app. It also incorporates NFC and has 3-in-1 DALI-2 digital dimming and KNX/Bluetooth/Matter wi
wireless dimming.
