

“EVO”

WIRELESS RFID PROGRAMMABLE LED DRIVER MODEL # RTLD040-900A-SA-RF

- Power dense platform (39.2w max) - Smaller than a business card
- Compliant with Title 24 flicker specification
- “Flicker free” – stable at its min voltage, no margin to factor
- Wide range AC input - 90-305vac
- Simplistic programming using “ROAL-set” wireless RFID
 - ROAL-set RFID does not require the driver to be powered
 - Can also be programmed with the RSOZ070-Ptool
- 0-10v / 1-10v dimming to 1%, can dim to off (DTO)
- True IP64 rated case (SA version)
- -30°C to 90°C case (TC) operating temperature
- Wide output current range 150mA to 900mA with an operational voltage range from 25 to 56vdc (*output power limited to 39.2w)
- **One single EVO driver will replace dozens of other driver models**
(the RTLD040-900A-SA-RF can replace 16 Strato and 12 Cielo units!!!)
